

POEM Technology Dash with Hologram global IoT SIM card

Global 3G/2G cellular MCU development board

- Derived from Hologram open source designs
- Ideal for low-power, low-data-usage applications
- Zero setup cellular IoT messaging
- Pre-certified end device
- Arduino IDE compatibility
- Over-the-air updates for your code
- Access to Hologram data engine

Includes:

- Poem Dash global 3G/2G cellular board
- Hologram global IoT SIM card
- Micro USB cable
- Quad band flexible UFL antenna

Support:

- For hardware/engineering support contact support@poemtechnology.com
- For connectivity/SIM setup go to hologram.io/start
